

STEM Recycled Fashion Parade

Celebrating Creativity and Sustainability at St Patrick's!

A huge congratulations to all the students at St Patrick's for their hard work and creativity in designing and making their own pieces of clothing from recycled materials. What an inspiring way to bring learning to life!

Students have been exploring the importance of recycling with the help of Sharon from the Wellington Shire, who taught us all about the 'Check it before you chuck it' message and how to use the correct bins. Through our learning, we've also discovered what different types of clothing are made from — some natural and some synthetic fibres — sparking lots of thoughtful discussions and innovative ideas in our classrooms.

A very big thank you to the local businesses and families who supported this project by providing recycled materials: Hunting Ground, Betta Electrical, Madden Glass, and Miss Bigham's mum's sewing room. Your contributions helped make this creative and sustainable project possible!
